

2020EV

Make your building's shared charger fair — and self-funding.

Scheduling and automatic electricity billing for communities that share a single ChargePoint charger.

Three problems every shared-charger building knows

- › **“Who gets the charger?” becomes a standing argument.**
2020EV gives each resident a priority weekday, opens weekends to first-come, shows the charger's live status in the app, and pings the next person the moment it's free — so scheduling sorts itself out without a single group text.
- › **The building quietly pays for everyone's electricity.**
Every completed session is billed automatically to the charging resident's prepaid balance at your building's real rate. The cost lands on whoever used the charger, not the association — cost recovery stops being a project and becomes the default.
- › **Reconciling it by hand is a monthly chore no one trusts.**
2020EV reads each session straight from ChargePoint every night and bills it to the penny with a receipt. No spreadsheet, no manual tracking, and nothing left for residents to dispute.

Everything your residents and board need — included

- ✓ **Live charger status**
see if it's free before you head down
- ✓ **Automatic nightly billing**
every session billed itself, no work
- ✓ **To-the-penny receipts**
full history each resident can see
- ✓ **Push notifications**
“your turn” and “session billed,” automatic
- ✓ **One admin dashboard**
set the rate, top up, refund, invite
- ✓ **Priority-day scheduling**
a fair turn for everyone; weekends open
- ✓ **Prepaid resident wallets**
no payment processor, no card fees
- ✓ **Low-balance alerts**
residents top up before they run dry
- ✓ **Community feed**
courtesy heads-ups without a group chat
- ✓ **Private & invite-only**
only your residents, never the public

No hardware. No electrical project. Live in about a week.

Running every day since early 2026 at a 20-unit condo on one Level 2 charger — zero disputes since.

Simple, honest pricing

\$199 per building / month

Founding rate of \$99/month for the first few communities willing to be a reference. No per-kWh markup, no transaction fees, no hardware to buy. Cancel anytime.

What your building needs

- ✓ A ChargePoint Level 2 charger, already installed
- ✓ About a week to go live (mostly ChargePoint access)
- ✓ A building admin to approve residents + set the rate

Getting started

- 1 You say yes**
we request ChargePoint data access that day
- 2 We set it up**
your community gets its app + admin dashboard
- 3 Residents join**
private invite links — no app-store hunting
- 4 It runs itself**
sessions bill nightly; you collect top-ups
